

MINUTES  
NEW JERSEY COMPUTER CLUB MEETING  
OCTOBER 12, 2005

Twenty-three people attended the meeting that started at 6:30 PM despite the heavy rain and the fact that the presenter, Gene Barlow, did not attend per agreement with Fred Sabin.

Fred introduced David McGarvey, the scholarship winner, to the club. A check for \$500 made out to Rider College was presented to David.

The President related the Executive Committee choices for club officers to the group.

Dues will be reduced from \$36 to \$20 for the year 2006. This was proposed to and passed by vote of attending members.

Fred related the issues identified at the Executive Committee meeting:

- internal membership awareness of communication
- external communications / publicity
- volunteerism within the club

Following a Random Access Q&A session, Rich Byrne gave a presentation on the Toyota Prius, a hybrid gas/electric car. Noted was the fact that the car contains 36 computer processors and that a unique electrical problem was solved with a simple "reboot".

Not noted was the fact that it was Columbus Day.

The meeting was adjourned at 9:00 PM.

Respectfully submitted,

Joe Schrettner

Acting NJCC Secretary
