

NEW JERSEY COMPUTER CLUB  
MEETING MINUTES  
JANUARY 11, 2006

President Fred Sabin called the meeting to order at 7:26 P.M with thirty-four attendees.

Fred spoke briefly on the following topics:

- MS Vista will be replacing Windows XP in the near future; Microsoft support for XP is expected to end 12/31/06
- Google package of software still available for download
- Scott Mueller's book is still available from Que Publishing
- Free WinBackup software is available from [www.backupanswers.com](http://www.backupanswers.com)
- The Club made \$1,314 at the Chinese Auction in December, which will go into the Scholarship Fund (NOTE: \$150 added at this meeting)
- I Sold It! stores, which sell items on Ebay for you, are proliferating
- Computer maintenance will be the February meeting topic

Richard Stiennon, VP of Threat Research for Webroot Software, gave an excellent presentation to the club. His topics included: defining spyware, avoiding infections, the "three-legged threat": vectors, actions and vulnerabilities, the adware economy, cyber-crime and information warfare. Mr. Stiennon made note of the fact that China is in an information war with the United States since May 1, 2001, when they shot down the US spy plane.

Webroot has generously donated "SpySweeper" CDs with a one year subscription to our NJCC Memorial Award fund. Copies are available at the meetings for \$15, while supplies last.

Fred adjourned the meeting at 9:00 PM.

Respectfully submitted,

Joe Schrettner  
NJCC Secretary
